

AIRSENSE™

HOME VENTILATION RANGE

HRV AirSense™ is home ventilation, reinvented. From the fan housing in your roof to the outlets in your rooms, our system has been redesigned and reengineered with New Zealand homeowners in mind.

The HRV AirSense™ range features four models, so there's sure to be one suited to your home and budget. Your HRV AirSense™ installation will be custom designed for your home and installed by one of our own trained installers.

HRV Lite™ is the affordable, capable New Zealand home ventilation system that's scientifically proven to reduce moisture¹, and helps prevent mould.

HRV Essential™ adds in-line flow controllers for optimising airflow to each room, a wider Smart Touch control panel and our new HRV app for complete system visibility and control.

HRV Essential+™ supports year-round comfort by adding an HRV Summer Kit, drawing fresher and cooler outside air into your home, delivering more air, more often.

HRV Balanced+™ is the ultimate in home ventilation, and helps solve the problem of the outside temperature being colder than the inside temperature for prolonged periods of time. This model features a heat exchanger, capturing heat energy from outgoing air. So you pump out the damp, stale air, not the heat!
