

# AIRSENSE™ BALANCED

## HOME VENTILATION

Smart Touch controller and app

**HRV AirSense™ Balanced is a fully featured New Zealand home ventilation system that's scientifically proven to reduce moisture and helps prevent mould<sup>1</sup>, featuring a heat recovery exchanger for winter comfort and an HRV Summer Kit for the warmer months.**

HRV Balanced<sup>2</sup> pressure system only draws fresh air from outside, incorporating a roof cavity bypass.

FEATURES	BENEFITS
New aerodynamic fan housing and German-made EC fan	More efficient operation
New WoolCare™ filter, made in New Zealand with FilterLayr™ nanofibre filtration technology	Reduces dust, mould spores, pollen and other common allergens
New aerodynamic ducting system	Greater efficiency to maximise airflow to your rooms
New in-line flow controllers	System is fine-tuned to deliver the ideal airflow to each room
New 5" Smart Touch Wi-Fi connected wall-mounted controller and smartphone app	Full system control plus visibility of all system air quality measures
New redesigned ceiling outlets	Efficient airflow across a range of design choices
Includes HRV Summer Kit	Draws fresher and cooler outside air into your home, delivering more air, more often
Balanced pressure system	Removes stale and moisture-laden air from your home, while simultaneously drawing in fresh air from outside
Heat recovery exchanger	Counter-flow design, providing up to 90% heat exchange efficiency

For warranty details see [hrv.co.nz/ventilation-warranty](http://hrv.co.nz/ventilation-warranty)

- Based on a scientific study of 15 New Zealand homes conducted by Unitec Institute of Technology (Auckland) on behalf of HRV during winter and spring 2021. Results may vary depending on design and geographic location of a home.
- Annual heat recovery exchanger filter replacement and system service required (includes two G2 filters).
