

HEAT TRANSFER KIT

STAND ALONE HOME VENTILATION ACCESSORY

EFFICIENT BALANCING OF TEMPERATURES IN YOUR HOME

- Distributes latent heat to other areas in your home

FEATURES	BENEFITS
Automated detection of uneven temperatures	Warm or cool air is pushed into other areas in your home
Centrifugal fan and insulated ducting	Innovative fan design creates pressure to push air rather than blow it, warming your house quicker
AC ¹ fan	Distributes air with high static pressure to provide high air flow at diffusers
Automated operation	Easy to set thermostat
G2 filtration	Purifies the air you move from one room to another, reducing dust concentrations from the air your family breathes

UPGRADE OPTIONS

Easy upgrade for your existing HRV ventilation system

1. Alternative current
