

SUMMER KIT

HRV SUMMER KIT BRINGS COOL, FRESH, FILTERED AIR INTO YOUR HOME.

Increases ventilation on warm days for extra comfort over summer.

FEATURES	BENEFITS
Brings in outside air from the cooler side of your home	Draws cool air from outside your home and delivers it where it's needed inside your home, providing cooler, fresh filtered air to improve indoor air quality for a healthier home.
HRV Ventilation Compatible	Fully compatible with HRV ventilation systems, seamlessly integrating to provide cooler, fresher air circulation during warmer months without compromising energy efficiency.
HRV Controller Integration	Take full control with your existing HRV controller. Set your Summer Kit to run automatically or adjust it manually whenever you like. Your controller even shows exactly where fresh air is being drawn from.

This accessory needs to be installed with an HRV ventilation system.
