

Under Bench - Omnipure

High Flow Filter System

APPLICATIONS

Residential, Commercial & Foodservice

GENERAL INFO

The Omnipure ELF Series brings high-quality, commercial-grade water filtration into your home.

This under-bench system delivers fresh, great-tasting water directly to your kitchen tap, reducing unwanted contaminants and helping protect appliances from scale and sediment.

The quick-change Omnipure design makes cartridge replacement simple and mess-free. The advanced carbon block technology helps reduce chlorine, taste, odour, sediment and cysts, ensuring clean and refreshing drinking water for your household.

WAT FILT UBELF

FEATURES | BENEFITS

COMMERCIAL GRADE FILTRATION

- ◆ High-capacity Omnipure ELF carbon block cartridge
- ◆ Helps reduce chlorine, taste, odour, sediment and cysts
- ◆ Supports improved protection for kitchen fixtures and appliances

GREAT TASTING WATER

- ◆ Enhances clarity and taste
- ◆ Reduces common earthy, musty or chemical flavours
- ◆ Retains beneficial minerals naturally present in water

ADDED BENEFITS

- ◆ Long-life cartridge reduces maintenance frequency
- ◆ Quick-change twist-off design – no tools required

TECHNICAL SPECIFICATIONS

Filter type: Carbon block filtration

Flow Rate: High flow design for under-bench applications

Filter capacity: Up to 75,000 litres

Micron rating: Nominal micron carbon filtration

Operating Pressure: Suitable for standard mains water supply

Operating temperature: Cold water use

Standards: NSF / ANSI certified components

Manufactured in: USA
