

HRV BALANCED

HOME VENTILATION

HRV Balanced is a fully featured New Zealand home ventilation system featuring a heat exchanger for winter comfort, reduced energy use, and scientifically proven moisture and mould control.

Smart Touch controller and app

FEATURES

BENEFITS

Balanced Pressure System

HRV Balanced draws fresh air from outside while extracting stale air at the same rate, supplying filtered air throughout your home to help keep your indoor environment healthier and more comfortable.

Cross Flow Heat Exchanger Core

Recovers heat from outgoing air and transfers it to incoming fresh air, with up to 88.9% efficiency, helping reduce heat loss and improve energy efficiency.*

5" Colour Touch Screen Wi-Fi Controller & Mobile App

5-inch full-colour touch screen offers intuitive navigation and clear visuals, while automated controls let users easily manage fan speed, and ventilation settings. With built-in Wi-Fi and VOC/CO sensors, the system connects to your home network for cloud-based diagnostics and remote software updates.

HRV High Performance Filter

Patented HRV Filter technology filters pollen, mould, and dust particles down to 0.4 microns. HRV filtration improves air quality and helps reduce triggers for asthma and allergies.

Dual Temperature Sensors

Temperature sensors on your wall controller and roof space help your system deliver the right mix of airflow and comfort.

German-Made EC Fan

Delivers powerful airflow with efficiency, giving customers a healthier, more comfortable home while saving on energy costs.

VOC & CO₂ Sensor

Help keep your indoor air cleaner by managing airflow and reducing pollutants.

HRV Diffusers

Stylish and adjustable ceiling diffusers to control airflow throughout the home.

5-Year Warranty

For peace of mind.

*Interdependently tested by i2 Energy Pty Ltd

FILTER LIFE:

2 years
